

## **March 26th, Is God Hiding?**

What were some things from this message that resonated with you?

Was there anything you wrestled with?

What are some examples of things in life that are worth spending time thinking about?

How can we obey God's command to love him with our minds?

What do you find more convincing - personal experiences or scientific and historical arguments?  
(Not just related to the existence of God, but forming beliefs in general)

The multiverse theory is speculative; in other words, it can't be measured or proven. Does God face the same issues?

### **Read Psalm 19:1-4**

“The heavens declare the glory of God; the skies proclaim the work of his hands. Day after day they pour forth speech; night after night they reveal knowledge. They have no speech, they use no words; no sound is heard from them. Yet their voice goes out into all the earth, their words to the ends of the world.”

What do you make of the fact that our universe allows life, despite the statistical improbability of such a universe existing?

In what ways do you encounter God in nature?

When we ask for more evidence of God's existence, why is that a reason to believe he exists?

Since God is powerful enough to create the universe, why would he come to earth?
